

Special Vehicle Listing:

The vehicles listed below are equipped with special windshields that contain metal in the glass (metal oxide) that prevents the ExpressPass card from being read properly. Windshields with solar ray glass, solar tint, heated or heat reflective windshields, and insulated or Insta-Clear glass may also prevent the card from being read properly. If you are unsure about whether your vehicle has one of the mentioned features, contact the dealer where you purchased your car. This vehicle list may change.
